

✓ DESCRIPTION

EliGene® Coeliac RT28 is intended for the screening of alleles:

- HLA-DQ2.5 (DQA1*05/DQB1*02)
 - HLA-DQ8 (DQB1*03:02)
- from isolated DNA.

Specimens: Buccal swabs, blood

Detection technology: TaqMan LNA

✓ PERFORMANCE STUDY

EliGene® Coeliac RT28 kit specificity was tested on 50 samples of human DNA with genotypes determined by DNA sequencing. Totally 50 samples were right determined by EliGene® Coeliac RT28.

The clinical specificity of EliGene® Coeliac RT28 kit is 100%.

Analytical sensitivity: from 1 ng DNA molecules.

Specificity: 100 %

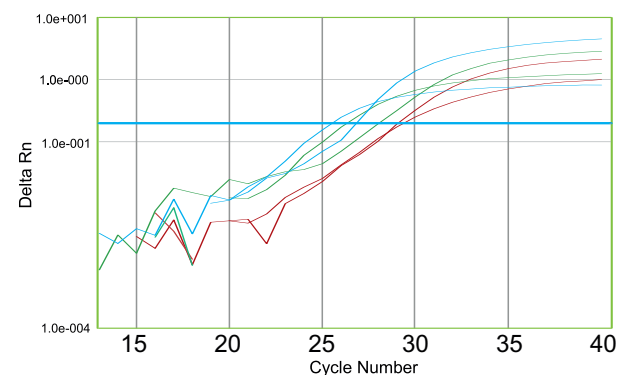

✓ ORDER DETAILS

Cat. No.: 90048-RT28

50 reactions

✓ ADVANTAGES

- Detection of HLA alleles associated with Coeliac Disease
- Real-Time PCR
- Results in 90 min.
- Including internal and positive control

✓ COMPATIBLE DEVICES

ABI 7000, 7300, 7500 FAST (Applied Biosystems); LightCycler® 480, LightCycler Nano, RotorGene 6000 or RotorGene Q (Qiagen)
